Alexandria Gazette. FRIDAY EVENING, FAB. 2, 1894.

RED LIGHT FOR SMALLPOX -O :e :f the smallpox pavilions on North Brother I- and, New York, is soon to be fi ted up with red glass in all of its windows, and at night its lights will shine through red glass globes. This is in accordance with one of the latest discoveries in medicine, which is that the skin of smallpox patients is extremely s-n-itive to the violet-colored r-ys of light, and that these form the pit ine which remains after the disease is cired. The experiments which demonstrated tr ted this theory were made in the City Hospital at Eerger, No way, where an the patients recovered, though severely attacked, and the dreaded pitting was avoided.

FOR YOUR SCRAPBOOK.-No century can begin on a Wednesday, Friday or Saturday. The 1st of October always falls on the same day of the week as the 1st of January; the 1st of April the same day of the week as the 1st af July: December the same as September; February, March and November begin on the same day of the week, while May, June and August commence on different days. Of course, these rules do not apply to leap year. The ordinary year always begins and ends the same day of the week, while every twenty-eighth year the calendar for the year is the same.
